November 13, 2024

This assessment was conducted by an ISA Certified Arborist on 10/23/2024. This lot contains a single family home. The purpose of this document is to apply for a permit application for removal of 1. Southern Live Oak. This tree is on conflict with the footprint of the proposed development of the property.

Condition ratings definitions:

Good- No major physical or health defects were observed that are expected to impact the long term healthy or viability of the tree.

Fair- Physical and or health defects were observed which may compromise the long-term health or viability of the tree but are correctable or can be managed to minimize impact.

Poor- Physical and or health defects were observed which are expected to directly lead to the death or physical failure of the tree and are not correctable thru typical arboricultural practices.

Dead- Tree is either completely dead or effectively destroyed with no reasonable expectation of recovery.

Measurements were recorded as follows:

Heights were visually approximated. Canopy spread was measured with measuring wheels.

Diameter at breast height (DBH) was measured using diameter tape (where possible) and rounded to the nearest half inch.

Tree #1: Southern Live Oak (*Quercus virginiana*) located on the slightly north western portion of the front of the existing structure is proposed for removal. The condition is good however the tree is in conflict with proposed construction.

Height: 35 feet

Spread: 40 feet

DBH: 22 inches

Please feel free to call me if you have any questions or comments
