

June 05th, 2026

Dear Mr. Chambers,

Thank you for your review.

The gas permit has already been closed and was completed in accordance with the approved plans under Permit No. **PL2025-0300**.

The current permit application is for **plumbing work only**. There are **no gas connections, gas piping modifications, or changes to the gas system** within the scope of this project, as shown on the submitted plans.

Additionally, there is an active and valid permit, **Permit No. PL2026-0202**, related to the gas work.

We respectfully request your assistance in continuing the review process based on the plumbing scope currently under consideration.

Thank you for your cooperation and assistance.

Sincerely,

Felipe Cortes
